Casey R Carl, DVM
Associate Medical Director

Paw Print Genetics® performed the tests listed on this dog. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results. Genetic counseling is available at Paw Print Genetics.

 Clinic Address: 10 Main Street PO Box 273
 Norway, ME 04268
 Phone: (207) 743-6384
 Fax: (207) 743-6384

Patient Information

Client: Schwarz, Karla
 Patient Name: Capri
 Reg. Name: Rendezvous Capri of Tia
 PennHIP Num: 135928
 Species: Canine
 Date of Birth: 15 Sep 2017
 Sex: Female
 Date of Study: 21 Oct 2019
 Date of Report: 25 Oct 2019

Tattoo Num:
 Patient ID: 103679
 Registration Num: TLM05044796
 Microchip Num: 933000120101143
 Breed: GOLDENDOODLE CROSS
 Age: 25 months
 Weight: 51.5 lbs/23.4 kgs
 Date Submitted: 22 Oct 2019

Findings

Distraction Index (DI): Right DI = 0.35, Left DI = 0.38.
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
 Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.38.
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.
 Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 1517 canine patients of the GOLDENDOODLE CROSS breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.32 - 0.76) for the breed. The breed average DI is 0.50 (solid square). The patient DI is the solid circle (0.38).

SUMMARY: The degree of laxity (DI = 0.38) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
