### RADIOGRAPHIC EVALUATION OF PELVIC PHENOTYPE WITH RESPECT TO HIP DYSPLASIA

\* The study must be repeated when the animal is 24 months of age or older to qualify for an OFA number.

EXCELLENT HIP JOINT CONFORMATION\*  
superior hip joint conformation as compared with other individuals of the same breed and age

GOOD HIP JOINT CONFORMATION\*  
well formed hip joint conformation as compared with other individuals of the same breed and age

FAIR HIP JOINT CONFORMATION\*  
minor irregularities of the hip joint conformation as compared with other individuals of the same breed and age

BORDERLINE HIP JOINT CONFORMATION  
marginal hip joint conformation of indeterminate status with respect to hip dysplasia at this time – Repeat study in six months

MILD HIP DYSPLASIA  
radiographic evidence of minor dysplastic changes of the hip joints

MODERATE HIP DYSPLASIA  
well defined radiographic evidence of dysplastic changes of the hip joints

SEVERE HIP DYSPLASIA  
radiographic evidence of marked dysplastic changes of the hip joints

#### HIP JOINTS - STANDARD VD VIEW RADIOGRAPHIC FINDINGS

- subluxation
- remodeling of femoral head/neck
- osteoarthritis/degenerative joint disease
- shallow acetabula
- acetabular rim/edge change
- unilateral pathology  left  right
- transitional vertebra
- spondylosis
- panosteitis
- other

#### ELBOW JOINTS – FLEXED LATERAL VIEW

negative for elbow dysplasia  L  R

#### ELBOW DYSPLASIA

Grade I  L  R

Grade II  L  R

Grade III  L  R

#### RADIOGRAPHIC FINDINGS

degenerative joint disease (DJD)  L  R

united anconeal process (UAP)  L  R

fragmented coronoid process (FCP)  L  R

osteocondrosis  L  R

Evaluations of Animals less than 12 months of age can be performed for private use of the owner. However, certification will not be possible at this age.

OFA recommends that the test be repeated when the animal reaches 12 months of age.

Test: CARDIAC

Results: NORMAL - CARDIOLOGIST

Paw Print Genetics® performed the tests listed on this dog. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in this panel. Please note that medical problems or may be passed on to offspring. These tests were developed and their performance verified by Paw Print Genetics. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed by Paw Print Genetics are DNA-based, genetic variations may interfere with the performance of some tests producing false results. If you think there is a problem with the test, please contact the laboratory immediately for further evaluation. In the event of a valid dispute or results claim, Paw Print Genetics will investigate the test to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results. Genetic counseling is available at Paw Print Genetics.
